

SILKO

IKONICO

*A unique experience
for experts of the kitchen.*

Silko's synergy of technology, design and flexibility has its fullest expression in the one-piece hygienic top, giving rise to endless combinations of equipment, finishes and colours.

This customisation makes each kitchen unique to the customer's taste and needs, transforming their working environment into a work of art that reflects their identity and creativity.

THE PROFESSIONAL KITCHEN WITH A ONE-PIECE WORKTOP

Modular soul, unique essence

A customised kitchen that combines the modular elements with the design of a seamless top for the ultimate expression of creativity.

Hygiene and safety

The single top guarantees a high level of hygiene, thanks to easy and quick cleaning in full compliance with hygiene regulations.

COMPOSE YOUR KITCHEN

4 Steps to make your unique piece

1

Functions

The cooking elements of both the gas and electric Essence 700 and 900 modular line can be applied according to your needs. The functions can be welded to the worktop, drop-in flush mounted, or free-standing.

2

Create your own aesthetic

The cooking island can be bridge-style, with a bolder, squared design, it can follow the iconic and elegant Essence aesthetic, or it can have the softer lines of rounded edges. The side panel can feature the standard equipment, the Essence aesthetic or have a square edge.

3

Define your top

The top made of 304 stainless steel, with a thickness of 20/10 or 30/10, can be customised by choosing between two types of available finishes: satin (Scotch Brite) or orbital, with the possibility of creating mirror-polished details.

4

Combine the accessories

Over 20 accessories are available for configuring the cooking island according to your needs. They include a pot rack, salamander grill with its own shelf, taps, a handrail and much more.

PROJECT MADE TO MEASURE

Our layout team will give you the best advice to design the project that best suits your needs, creating a kitchen that can adapt to any environment, optimise work processes and limit the chef's movements.

IKONICO

Ikonico represents the totally customisable kitchen block, tailor-made for the customer, from functions to finishes, worktop and accessories.

To best suit the available space, the kitchen can also be configured in colour, with a choice of all RAL variants.
